

Miele

Performance Is Handmade. Not Handwashed.

Effective and automatic lab glassware cleaning —
with our ExploreLine.

Miele

59 % less time¹

Gentle cleaning of up to 60 items
of lab glassware in 24 minutes

EASYLOAD

Flexible, fast and highly efficient

Consistent, **analytically clean results**
thanks to a standardised process

63 %¹

less water consumption

Sustainable

Saving resources and
reducing glass breakage

Performance Is Crucial In Your Lab.

By switching from manual to automated lab glassware cleaning you can take the load off your hands and save valuable time and resources. Take the next step in your lab with our new ExploreLine – for simple, safe, sustainable and cost-efficient lab glassware cleaning.

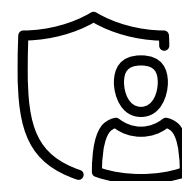

Intuitive and **fast**  **touch control**

150 %¹

Increased throughput

Reduced workload

Time for other tasks

Increase safety in your lab for your employees too. A commercial laboratory washer reduces the health risks to employees thanks to a reduction in the amount of aerosols inhaled, exposure to chemicals and the risk of injury. This reduces levels of sick leave among staff caused by illness and accidents.

Read the white paper
“Manual vs. automated cleaning”
[www.miele.xy/
pro/whitepaper-lab](http://www.miele.xy/pro/whitepaper-lab)

¹ compared to manual cleaning, savings with PLW 8604, heating: 8.5 kW (3N AC 400 V 50 Hz), connection to cold water and demineralised water (15 °C). Other technical framework conditions may result in different values.

Analytical Cleanliness With Minimum Effort.

Benefit from intuitive operation and many other features that make your everyday lab work easier.

Simple.

Thanks to intuitive menu navigation and the clear touch display, our ExploreLine laboratory washer is easy to operate. You have quick access to predefined programmes, can make individual settings and receive information on the programme status.

And loading is straightforward too: thanks to our modular EasyLoad accessory system, a wide variety of glassware types can be positioned easily and safely – providing maximum flexibility to suit your individual requirements.

Cost-efficient.

A laboratory washer makes workflows in labs considerably more efficient. You can clean up to 60 items of lab glassware in 24 minutes, which means time savings of up to 59 % compared to manual cleaning. This takes the burden off employees, who can devote themselves to other tasks and work more efficiently.

Gentle cleaning also extends the service life of expensive glassware and lab utensils, safeguarding your investments.

Safe.

Automated cleaning with our ExploreLine laboratory washer gives you consistent, analytically clean results – in every programme sequence. It also reduces the health risks for the entire team thanks to a reduction in the amount of aerosols inhaled, exposure to chemicals and the risk of injury.

Automated cleaning is also safe for your lab glassware – firstly, there is less glass breakage and, secondly, the material is protected – ensuring a long service life for your lab glassware.

Sustainable.

The programmes, which are precisely tailored to the cleaning processes, enable valuable resources to be saved – compared to manual cleaning, 63 % less water is used and ExploreLine cleans more lab glassware and equipment in the same amount of time. This saves energy and therefore reduces costs in the long term.

Automated Instead of Manual.

The ExploreLine PLW 8604 laboratory washer is your starting point for automated lab glassware cleaning.

ExploreLine is the effective and economical solution for labs in schools, universities, small businesses and, in fact, anywhere requiring simple solutions.

Your lab. Your choice.

We offer a wide range of different accessories and detergents so that you can perfectly match ExploreLine to your individual needs.

From upper basket to lower basket, various inserts, injector modules and even ProCare Lab detergents – choose your package and we will customise our offer to meet your needs.

Simply scan the QR code and start the configuration process.
